

- Diabetes is a modifiable risk factor for cardiovascular disease (CVD)
- Patients with coexistent diabetes and coronary artery disease are at higher risk for recurrent myocardial infarctions and complications such as in-stent restenosis
- Screening for diabetes using a HbA1c blood test in patients with CVD carries a Class IA recommendation<sup>1</sup>
- NHS Golden Jubilee National Hospital (GJNH) is a tertiary cardiac referral centre in Scotland
- Currently, screening for diabetes in patients
